TYPOGRAPHY

Heebo is the primary typeface.

We use Heebo for it's utilitarian simplicity.

We use the **BLACK** weight in ALL CAPS with a tight leading for headlines.

Regular is used for paragraphs, and **bold** can be used to bring emphasis to key points.

The full font family can be found in our brand kit or downloaded from [Google Fonts](#).

CORE COLOUR PALETTE

The core Quicket colour palette is vibrant and clean.

The **QUICKET GREEN** is distinct and recognizable.

ORANGE is used as a situational highlight.

Two shades of grey are used for text on light backgrounds, The **DARKER** shade for headings and the **LIGHTER** grey for paragraphs.

Pure white is used for page backgrounds as well as text over darker backgrounds.

#404040

#59595C

EXPANDED COLOUR PALETTE

In situations where additional colour is required, Quicket has an expanded palette that can be used situationally to complement the core brand colours.

Quicket primarily uses flat colour treatments. However, when a gradient is needed, a blend between the two Quicket greens should be used.
